

SAMMAN BHETWAL

📞 201-887-8818 ✉ sbhetwal@ramapo.edu [in LinkedIn](#) [Github](#)

Technical Skills

Languages: Python, C++, C, HTML/CSS, JavaScript

Developer Tools: VS Code, Google Cloud Platform, Jira, Android Studio, Docker, Kubernetes

Technologies/Frameworks: Linux, GitHub, ReactJs, VueJs, MongoDB, Node.js, Express.js

Experience

HimalayaWebWorks

May 2023 – Present

Full Stack Engineer

- Transitioned to a full-stack development role, utilizing MERN stack proficiency to create tailored web solutions for global clients, boosting project efficiency by 30%.
- Direct interns in project execution, leveraging project management tools like Jira and Trello to enhance task organization, collaboration, and transparency, resulting in a 50% increase in team productivity and timely project completion.
- Implement state-of-the-art security measures like two-factor authentication, OAuth authentication, and role-based access control, to fortify client data and ensure compliance with industry regulations increasing the customer satisfaction rate by 30%.
- Deployed and managed containerized applications efficiently using Docker and Kubernetes, showcasing adeptness in orchestrating scalable and resilient infrastructure solutions while ensuring seamless application deployment and management.

HimalayaWebWorks

May 2022 – April 2023

Front End Developer Intern

- Collaborated with the design team to engineer mockups and wireframes into over 20 visually stunning and responsive websites tailored for various organizations, including NGOs, INGOs, and tourism companies.
- Implemented interactive features and dynamic content with HTML, CSS, and JavaScript, and further utilized frameworks like React.js and Vue.js to boost user engagement and enhance overall experience across platforms.
- Optimized user experience and site performance by integrating Redux for streamlined state management, resulting in a 40% decrease in load times, and a 25% increase in user satisfaction.
- Assisted in deploying and managing containerized applications using Docker and Kubernetes, including creating Docker images, configuring Kubernetes manifests, and troubleshooting containerization issues.

Projects

ShareBowl | *JavaScript, ReactJs, Express, MongoDB, NodeJs, Github*

[Code](#)

- Engineered backend functionalities that facilitate email-based authentication links, ensuring secure user access and authentication flow
- Integrated Google Maps API to enable users to visualize the location of free food events and food drive initiatives directly within the ShareBowl platform.
- Designed user interface mockups using Figma for seamless integration with the backend functionalities and wrote well over 30 endpoints that seamlessly integrate to the front end.

Glee-Share Laughter | *JavaScript, ReactJs, Express, MongoDB, NodeJs, Github, Jira*

[Code](#) | [Video](#)

- Designed and developed a dynamic and interactive social media application using the MERN stack with an intuitive user interface powered by Material UI.
- Wrote well over 15 APIs that seamlessly integrate to the front end facilitating user registration, authentication, and engagement, enabling users to create posts, like, comment, and share content within the platform.
- Utilized Github and Jira for effective project management.
- Participated and emerged victorious, at the Rutgers University Hackathon 2023, in the Social Good category.

Sales Analysis Pro | *Python, Trello, Google Meet, Matplotlib, Seaborn*

[Code](#)

- Led a team of 4 students to analyze an electronic dataset using Python's pandas and matplotlib and extract insights on top-selling products, regional performance, and customer preferences, enabling data-driven business decisions.

Education

Ramapo College of New Jersey

Bachelor of Science in Computer Science

Relevant Courses: Data Structures, Web Application Development, Software Design, Analysis of Algorithms, Big Data, Data Analytics in Python, Operating System, Software Design, Object-Oriented Programming
