

SAMMAN BHETWAL

201-887-8818 sammanbhetwal2025@gmail.com [Linkedin](#) [Github](#) [Portfolio-website](#)

Passionate and persistent software developer who approaches problem-solving with a human-centered mindset. Believing in how we build matters just as much as what we build—empathy is not an afterthought but a guiding principle in my process. With a strong focus on quality, I take care in every aspect of development, bringing a startup mindset, adaptability, and a commitment to delivering robust, high-quality software.

Certifications

Microsoft UX Design Professional Certificate

Udemy Level Up Your UI/UX: Interactive Design & Prototyping Figma

Technical Skills

Languages: C++, JavaScript, Java, Python, C, HTML/CSS, Prolog, Scala

Developer Tools: VS Code, Google Cloud Platform, Android Studio, Figma

Technologies/Frameworks: Linux, GitHub, ReactJs, VueJs, SQLite, MongoDB, Node.js, Express.js, PySpark

Projects

Multi-Paradigm Yahtzee | C++, Java, Prolog, Github

[Code](#) | [Figma](#)

- Engineered a multi-paradigm Yahtzee game in C++ (OOP), Java (Event-Driven for Android), and Prolog (Logic-Based), each with a robust AI leveraging graph algorithms and strategic decision-making.
- Achieved a 100% win rate for computer player through 100+ test cases and implemented game state serialization for seamless continuity.
- Adapted the game into an Android app using the MVC pattern, creating and iterating a high-fidelity wireframe 3 times based on user feedback to enhance engagement through human-centered UI/UX design.

Glee-Share Laughter | JavaScript, ReactJs, Express, MongoDB, NodeJs, Github, Figma

[Code](#) | [Video](#)

- Utilized design thinking principles to empathize with users, identify pain points, and craft and iterate intuitive UI/UX designs based on user feedback to enhance usability and accessibility.
- Developed a responsive front-end and integrated 15+ RESTful APIs, enabling users to post, like, comment, follow others, and securely log in with password recovery options.
- Won 1st place in the Social Good category at the Rutgers University Hackathon 2023.

Roadrunner Mart | JavaScript, ReactJs, Express, MongoDB, NodeJs, Github, Figma

[Code](#)

- Designed a high-fidelity prototype with clear information architecture, visual hierarchy, and effective calls to action.
- Built a full-stack Marketplace enabling students to buy and sell items utilizing Stripe for secure transactions.
- Architected robust backend with 50+ RESTful API endpoints, enabling users to log in, log out, create posts, manage orders, process payments, recover passwords, and interact with other users.

Student Health Risk Prediction using Machine Learning | Python

[Code](#)

- Performed EDA to analyze lifestyle, physiological, and behavioral factors affecting student stress and health using correlation matrices.
- Developed and evaluated machine learning models for health risk classification (Logistic Regression, SVM, KNN, Naive Bayes) and stress level prediction (Bagging Regressor, Random Forest, SVM, Gradient Boosting), achieving 89.5% accuracy with an ensemble model and 54.22% variance explained with Bagging Regressor.

Experience

Ramapo College of New Jersey

ITS Student Aide

02/2022 – Present

- Resolved 1,000+ technical support tickets with patience and empathy, effectively communicating with users to diagnose and address issues related to user accounts, system maintenance, hardware upgrades, and software installations.

Resident Assistant

02/2023 – Present

- Led and supported a residential community of over 1,000 residents, trained 15+ new RAs, and managed administrative tasks and over \$4,000 in programming funds to successfully plan and execute 50+ community-building events.

Education

Ramapo College of New Jersey

Expected: 06/2025

Bachelor of Science in Computer Science

Computer Science Courses: Data Structures, Web Development, Analysis of Algorithm, Operating System, Software Design, Object-Oriented Programming, Organization of Programming Languages

Data Science Courses: Data Analysis in Python, Data Visualization, Machine Learning, Big Data
